

Snow White Screen

manufactured by MW spol. s r.o., Czech Republic
with **realD** Precision White™ Screen Technology

Snow White Screen at 7.8 FL Peak

3D silver at 7.8FL Peak

The ultimate high end screen for perfect 3D and 2D projection, which is offered exclusively to RealD customers.

MW has incorporated RealD's new screen technology into a line of new screens, which deliver a much brighter and more uniform screen in comparison to standard screens.

A smooth surface generates better image contrast and optimal reflection performance.

Using the patented RealD-pigments this 1,4 gain screen reflects 40% more light, while giving an extra wide 40° HGA (half gain angle).
